Sir:

In response to the Office Action dated June 17, 2009, please consider the remarks as submitted herewith on the accompanying pages.

REMARKS

Claims 10 and 12-20 are pending in this application. Claims 16-19 were previously withdrawn from consideration.

Claim Objections

The Examiner has objected to claim 10 because the Examiner believes the language of claim 10 should read “and the predetermined rotational angle is an angle beginning at 90 degrees before a position where the height of the light is lowest and ending at 90 degrees after the position where the height of the flight is lowest”. Applicant respectfully traverses the objection.
